The primary reason for the allowance of claims 8-14 is the inclusion of the following limitations: "downloading said test programs from said server for execution by said computing devices coupled thereto, so that at least first and second computing devices among said plurality execute different first and second test programs from said suite substantially simultaneously; receiving requests at said server from said computing devices with respect to said execution of said test programs to determine a next test to execute at each of the computing devices, wherein each of said requests contains said respective unique identifier".
